DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-5, 8, 9, and 11, drawn to moving image conversion, classified in class 375, subclass 240.26.
 - II. Claims 6-8, 10, and 12, drawn to temporal subsampling of a moving image, classified in class 375, subclass 240.21.
 - III. Claims 7 and 13-20, drawn to color reduction of a motion image, classified in class 348, subclass 391.1.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I, II, and III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct if they do not overlap in scope and are not obvious variants, and if it is shown that at least one subcombination is separately usable. In the instant case, subcombination I has separate utility such as generating images for a display device having a different resolution than the originally encoded image. See MPEP § 806.05(d).

The examiner has required restriction between subcombinations usable together. Where applicant elects a subcombination and claims thereto are subsequently found allowable, any claim(s) depending from or otherwise requiring all the limitations of the allowable subcombination will be examined for patentability in accordance with 37 CFR 1.104. See MPEP § 821.04(a). Applicant is advised that if any claim presented in a

Art Unit: 2621

continuation or divisional application is anticipated by, or includes all the limitations of, a claim that is allowable in the present application, such claim may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application.

Claim 7 depends on claim 6, which is in Invention II. However, the subject matter of claim 7 itself is in Invention III. Accordingly, if applicant elects Invention II, and all claims therein (6, 10, and 12) are found allowable, claim 7 will be examined for patentability on the merits. If applicant elects Invention III (claims 13-20), claim 7 will be withdrawn from consideration under 37 CFR 1.142(b) as directed to non-elected invention II.

Claim 8 depends on claim 6, which is in invention II. However, the subject matter of claim 8 itself is in Invention I. Accordingly, if applicant elects Invention II, and all claims therein (6, 10, and 12) are found allowable, claim 8 will be examined for patentability on the merits. If applicant elects Invention I (claims 1-5, 9, and 11), claim 8 will be withdrawn from consideration under 37 CFR 1.142(b) as directed to non-invented election II.

3. Because these inventions are independent or distinct for the reasons given above and there would be a serious burden on the examiner if restriction were not required because the inventions have acquired a separate status in the art in view of their different classification, restriction for examination purposes as indicated is proper.

4. A telephone call was made to Marc S. Weiner on 20 September 2007 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to David N. Werner whose telephone number is (571) 272-9662. The examiner can normally be reached on Monday-Friday from 8:30 AM - 5:00 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Mehrdad Dastouri can be reached on (571) 272-7418. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
